

**Speaker Plot Notes**

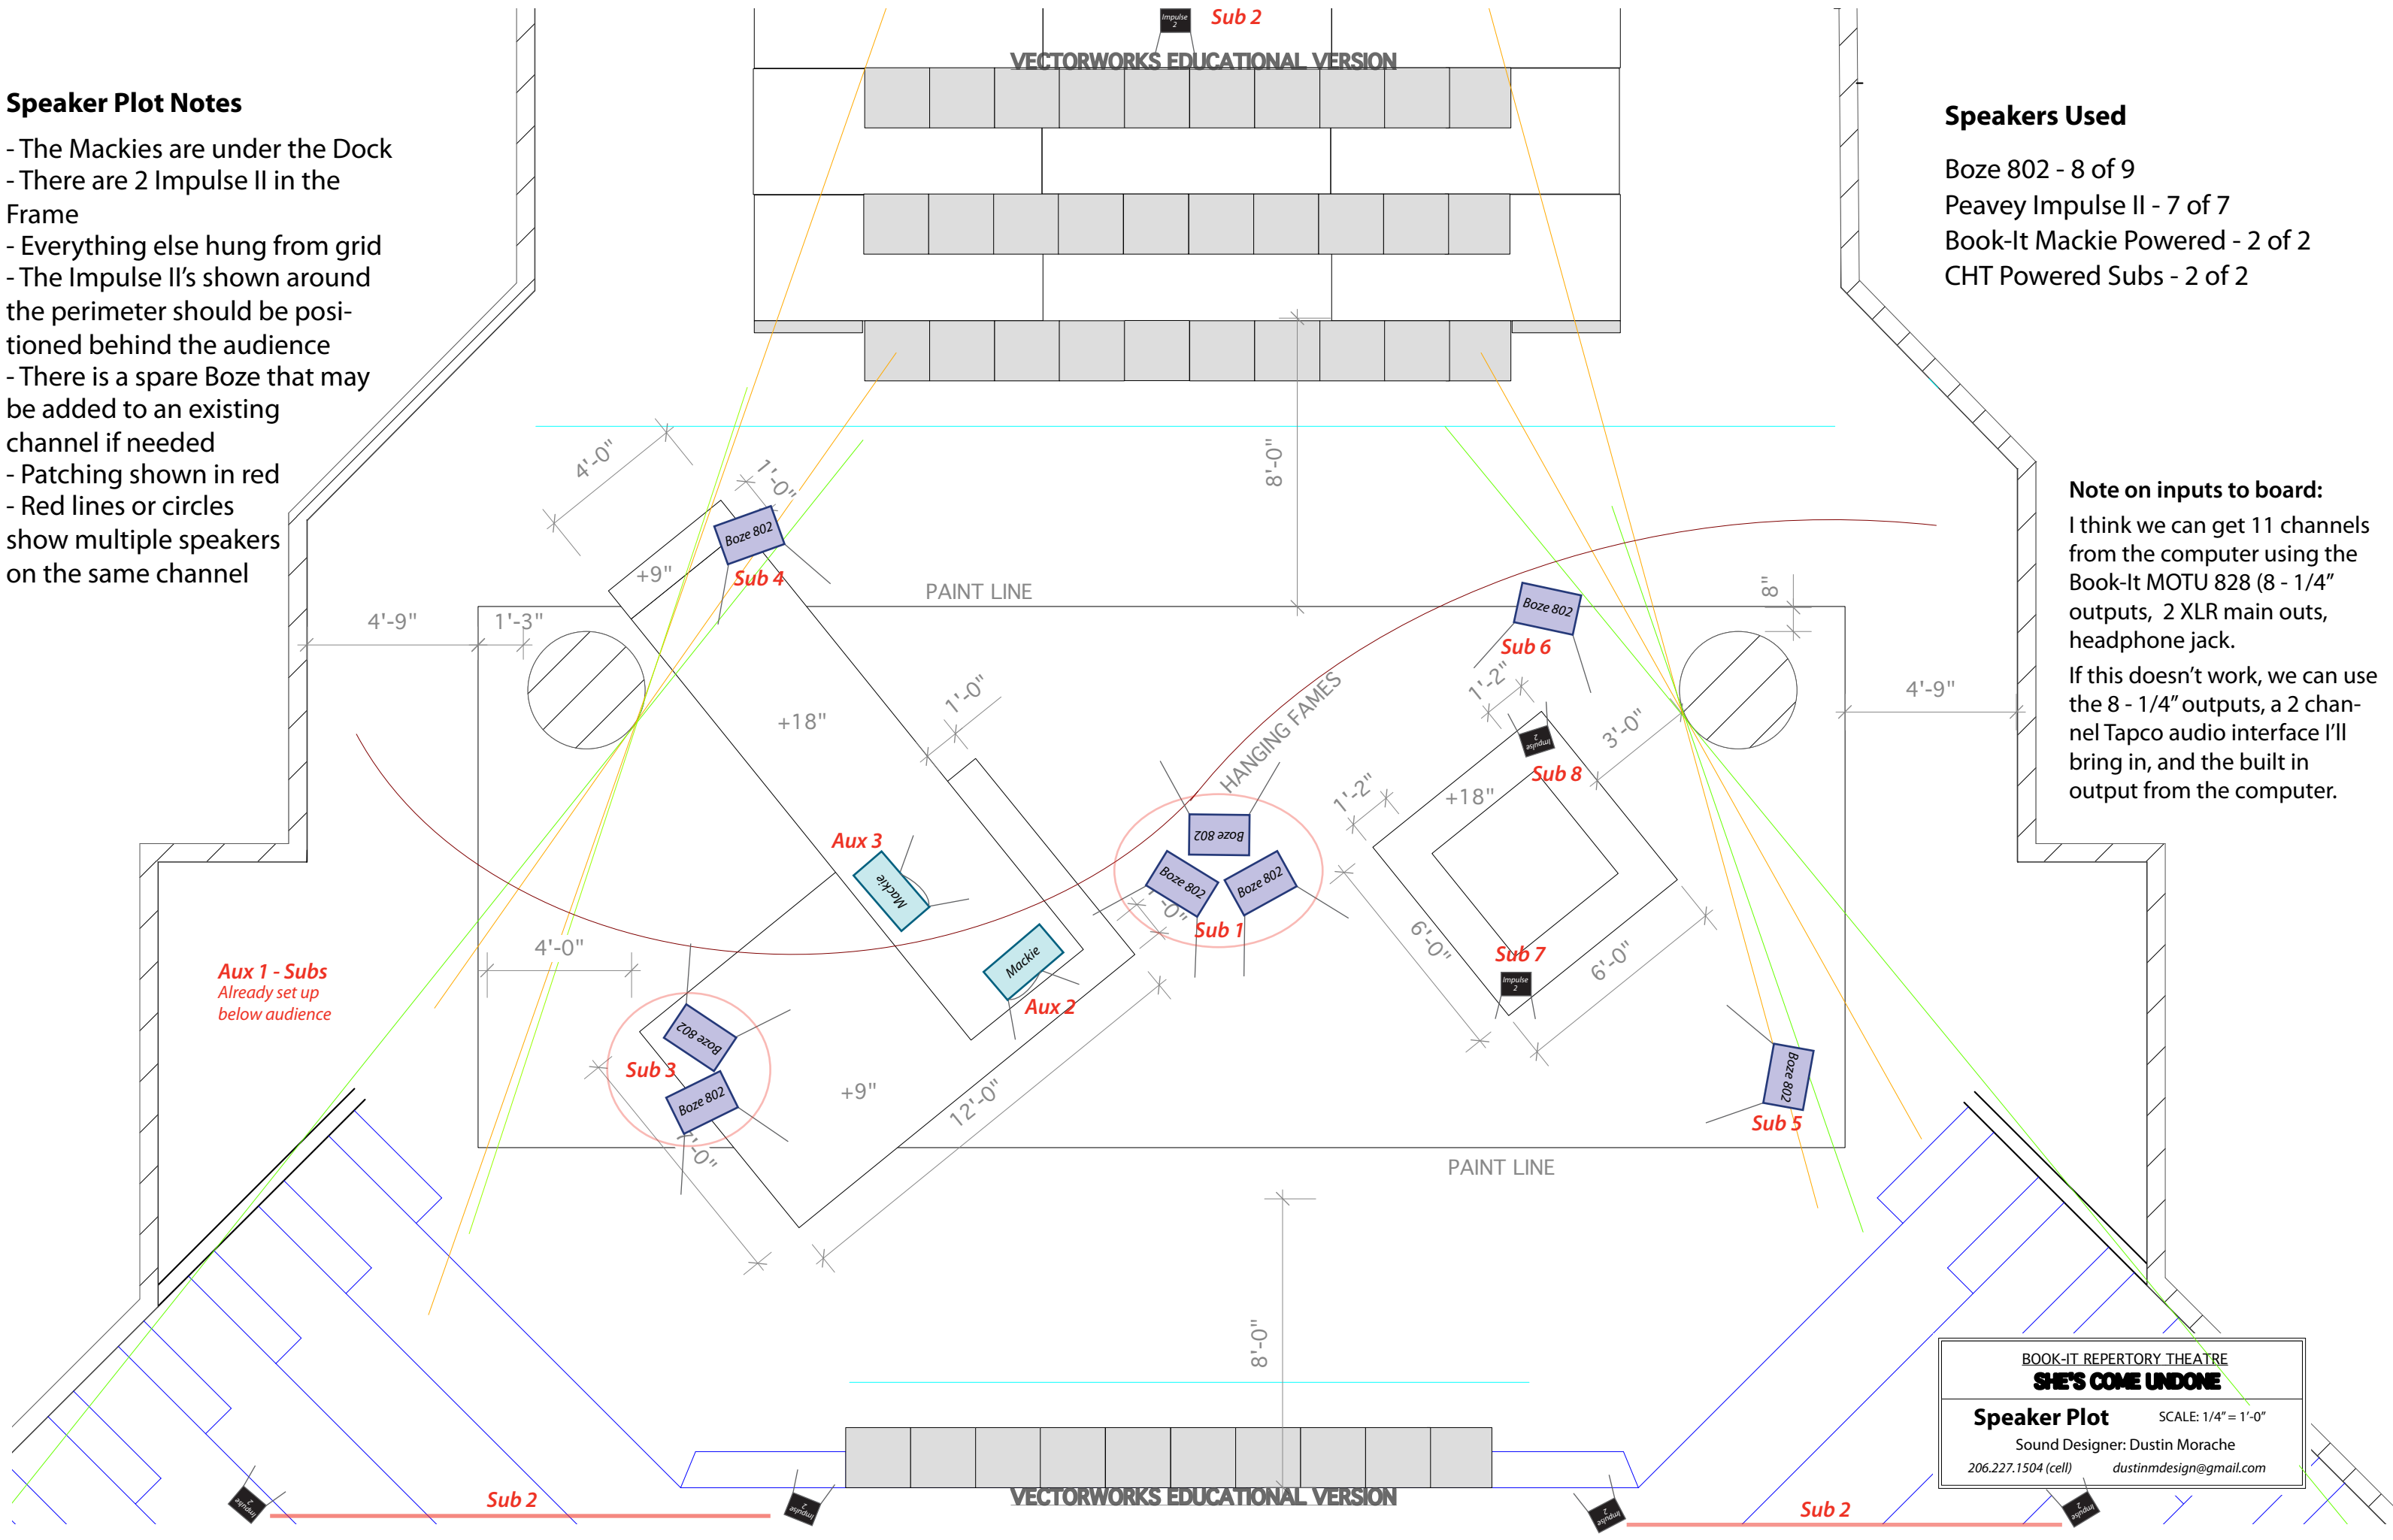

- The Mackies are under the Dock
- There are 2 Impulse II in the Frame
- Everything else hung from grid
- The Impulse II's shown around the perimeter should be positioned behind the audience
- There is a spare Boze that may be added to an existing channel if needed
- Patching shown in red
- Red lines or circles show multiple speakers on the same channel

**Speakers Used**

- Boze 802 - 8 of 9
- Peavey Impulse II - 7 of 7
- Book-It Mackie Powered - 2 of 2
- CHT Powered Subs - 2 of 2

**Note on inputs to board:**

I think we can get 11 channels from the computer using the Book-It MOTU 828 (8 - 1/4" outputs, 2 XLR main outs, headphone jack).  
 If this doesn't work, we can use the 8 - 1/4" outputs, a 2 channel Tapco audio interface I'll bring in, and the built in output from the computer.

*Aux 1 - Subs  
 Already set up  
 below audience*
